DETAILED ACTION

Response to Election

The examiner is in receipt of applicant's response to office action mailed 1/9/2007, which was received 1/24/2007. Acknowledgement is made to the election of group I including claims 30-47 without traverse. The examiner noticed that an election of species was not made. Mr. Stephan Filipek was contacted and asked to choose a species, he selected Group IA which includes claims 30, 46 and 47.

Examiner's Note

Examiner has cited particular columns and line numbers or figures in the references as applied to the claims below for the convenience of the applicant. Although the specified citations are representative of the teachings in the art and are applied to the specific limitations within the individual claim, other passages and figures may apply as well. It is respectfully requested from the applicant, in preparing the responses, to fully consider the references in entirety as potentially teaching all or part of the claimed invention, as well as the context of the passage as taught by the prior art or disclosed by the examiner.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140

Art Unit: 3625

F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 30,46 and 47 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1,15-17,22 and 23 of U.S. Patent No. 6,754,636. Although the conflicting claims are not identical, they are not patentably distinct from each other because although the claims of the instant application start at the retailer, the overall steps are the same and the transaction which takes place emulates the patented case.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 30,46 and 47 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for a purchasing system receiving and making payment to a retailer, the instant application does not reasonably provide enablement for a forth party (party different from the buyer) providing the payment. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to practice the invention commensurate in scope with

these claims. The examiner contacted Mr. Steven Filipek who explained that FIG 57A showed the fourth party in the form of the of the subsidy provider and the commission provider. The examiner noted that although these parties may contribute to the price paid the purchasing system is responsible for the ultimate payment to the retailer. For the purpose of this prosecution the party different from the buyer will be considered the purchasing system.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 46 and 47 recites the limitation ""the buyer" and "the purchasing system" in beginning of the claims. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 30,46 and 47 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sendwine.com and further in view of The Record.

In regards to claims 30,46 and 47, Sendwine.com (an article found in PTO 892), teaches financial agreements being made between a purchasing system and a retailer

Art Unit: 3625

to deliver a product based on a first price agreed to between the retailer and the purchasing system and not on a price agreed to between the buyer and the purchasing system, but does not specifically mention that the buyer is taking possession of the product. The Record teaches an Internet order for alcoholic beverages being picked up at a local retailer. It would have been obvious to a person having ordinary skill in the art at the time of the invention to include in Sendwine.com, the picking up of the product from a local retailer, because this would assure that identification is checked and a proper legal transaction is consummated.
